

ADMISSION NOTE

Patient: John Smith
MRN: 001-234-567
Date of Birth: 1955-03-14
Sex: Male
Age: 69

Admission Date: 2024-11-01
Admitting Physician: Dr. A. Johnson

Chief Complaint:
Chest pain and shortness of breath for 2 days.

History of Present Illness:
Mr. John Smith is a 69-year-old male with a known history of type 2 diabetes mellitus, hypertension, and hyperlipidaemia who presented to the emergency department on 2024-11-01 with a 2-day history of worsening chest pain radiating to the left arm, associated with shortness of breath and diaphoresis. He denies fever, cough, or lower limb swelling.

Past Medical History:
1. Type 2 diabetes mellitus (on metformin)
2. Hypertension (on lisinopril 10mg daily)
3. Hyperlipidaemia (on atorvastatin 40mg nightly)

Medications on Admission:
1. Metformin 1000mg twice daily
2. Lisinopril 10mg daily
3. Atorvastatin 40mg nightly
4. Aspirin 81mg daily

Allergies: Penicillin (anaphylaxis), Sulfa (rash)

Physical Examination:
BP: 158/94 mmHg HR: 96 bpm RR: 18 SpO2: 97% on room air
Mild diaphoresis noted. JVP not elevated. S1S2 heard. No murmurs.

Initial Assessment:
Likely acute coronary syndrome. Rule out NSTEMI.

Initial Plan:
1. ECG - done, showing ST changes in leads II, III, aVF
2. Troponin - sent, pending
3. Chest X-ray - ordered
4. Cardiology consult - requested
5. Continue aspirin, hold metformin pending contrast study
