

PROGRESS NOTE · Day 2

Date: 2024-11-04

Patient: Margaret Chen MRN: 002-456-789

Subjective: Family reports patient slightly more alert. Eating better.

Objective:

BP: 148/84 HR: 74 Temp: 37.8°C

Urine culture: PENDING · sent yesterday

Assessment:

1. Delirium · improving. Likely UTI as precipitant (dysuria reported by family).
Commenced empirical trimethoprim 200mg twice daily for UTI pending culture.
2. Supratherapeutic INR · INR now 3.9 (down from 4.8). Warfarin held.
Will restart at reduced dose when INR in range.
3. Atrial fibrillation · rate controlled, no cardioversion planned.
4. Falls risk · physiotherapy review requested.
